ABOUT ME

For the moment I produced "Hello World" in the console for my first application. I knew I was hooked on the world of software development. But software development has never been "just a job" for me, It offered an engaging challenge for me and contentious learning and improving my skills to produce high-quality software. What began with a simple "Hello World" has become a passion that only gets exciting every new day.

SKILLS

- HTML
- CSS
- BOOTSTRAP
- JAVASCRIPT
- GIT

EXPERIENCE

- **EXPENSE TRACKER** (https://knowhowyoudid.netlify.app)

Built with HTML, Materialize as my CSS processor, and plain JAVASCRIPT. This expense tracker stores your data in the local storage.

- **ADVICE GENERATOR** (https://frontendadvice.netlify.app)

Built with HTML, CSS, and JAVASCRIPT to fetch an API for the project. This was Frontendmentor.io's challenge. On the click of the dice button or reload on the window new advice is generated.

- **TIC-TAC-TOE-GAME** (https://x-o-tic.netlify.app)

I used HTML, CSS, and JAVASCRIPT to build this game. This game has two players and each player's activity is shown on the UI and also indicates who's turn it's as well it will refresh after a win or draw and everything happening in the game is recorded and shown on the UI.

- **PORTFOLIO PROJECT** (https://yahya-burhan-portfolio.netlify.app)

I used HTML, CSS, and JAVASCRIPT in this portfolio. I have always wanted to build one of my own since knowing how to build a website and seeing other developers' cool portfolios.

INTERESTS

- **Reading:** Self Development books mainly on the internet.
- **Watching Netflix:** Peaky Blinders.
